

# MEGA – PEXESO

## SUITABLE FOR OLDER PUPILS

- 1.** The set contains 2 packs of 15 pairs of playing cards with depictions of characters and lore from the Animalia series with a cyber security related word printed in the corner. Just print the set and let the kids cut them out, bend them in the middle and stick them together, as they would be printed on both sides – or do it yourself.
- 2.** All you need to play this game with your students is the printout, glue and a pair of scissors.
- 3.** One pack of cards contains words which are suitable for all ages, while the other pack includes words that are more suitable for older pupils in the 2nd stage of elementary school. Be careful to only choose suitable and age appropriate words for your pupils. You can mix and match the cards from both packs as well.
- 4.** Shuffle the cards and place them on the table with the character side facing down.
- 5.** The goal of the game is to pick one card and find your counterpart with the same character and text. If you find the correct pair you get one point, and if you can explain the word properly you get 2 points.
- 6.** The winner is the one who has the most points after there are no cards left on the table.
- 7.** After playing this game with your pupils start a discussion about words that students don't understand or the whole topic of internet security – for more information about it go visit [www.eset.com](http://www.eset.com)
