CHARADE

SUITABLE FOR OLDER KIDS

1. The set includes a game board and a deck of cards for each category (Social, Sharing, Media, Security and Joker) featuring characters from the Hey PUG! series and words related to cybersecurity.

2. All you need is the printout, scissors, glue and dice (or a dice app on your phone). Just print the set and have the kids cut them out, fold them in the middle and glue them together as if they were printed on both sides - or do it yourself.

3. Let the kids use their imagination and choose their game piece from different objects in the room.

4. Sort the cards into 5 decks according to their colors/themes. Players then split into teams. Each player rolls a dice and lands on a colored spot. Then the player chooses a card by color and sees a word.

5. The Joker is a special card. When your kid lands on the Joker, they can make up a word, as long as it is related to computers and the online space, and verify it with the teacher or parent.

6. They keep the word to themselves and decide whether to describe the word shown without using the root word or by drawing it on the black/whiteboard.

7. The team that guesses the correct answer moves as many steps as it rolled the dice. The first team to reach the end wins.

8. After playing this game, start a discussion about the words the kids don't understand or about the whole topic of internet safety. For more information, visit https://saferkidsonline.eset.com/.

NOTE: We recommend following the marked age group (younger/all ages or older kids) to make sure all the words are age appropriate. Feel free to mix and match cards from both decks as you see fit.
